

# Web-Smart Switch Searching Utility

## User's Guide

### Introduction

We provide this utility for network administrators to manage switches efficiently. You may find those listed switches in your LAN with information about their respective switch names, MAC addresses and IP addresses. You may also get access to their WEB-based management interface easily by clicking on a button easily. To learn more about using this utility, please refer to the following table:

### Configuration

#### Searching switches in your LAN

Double click the **"Web Smart Switch Search.exe"** icon in the included CD. Click the **"Search"** button to start searching. Those switches are going to be listed above. You may find the switch that you are going to configure according to their switch name, MAC addresses or IP addresses.

#### To start the WEB based management interface

Click on this switch on the list that you searched. Click on the **"Open Web"** button to get accessed. Please note that you should have your computer and the switch to be in the same IP address range.
